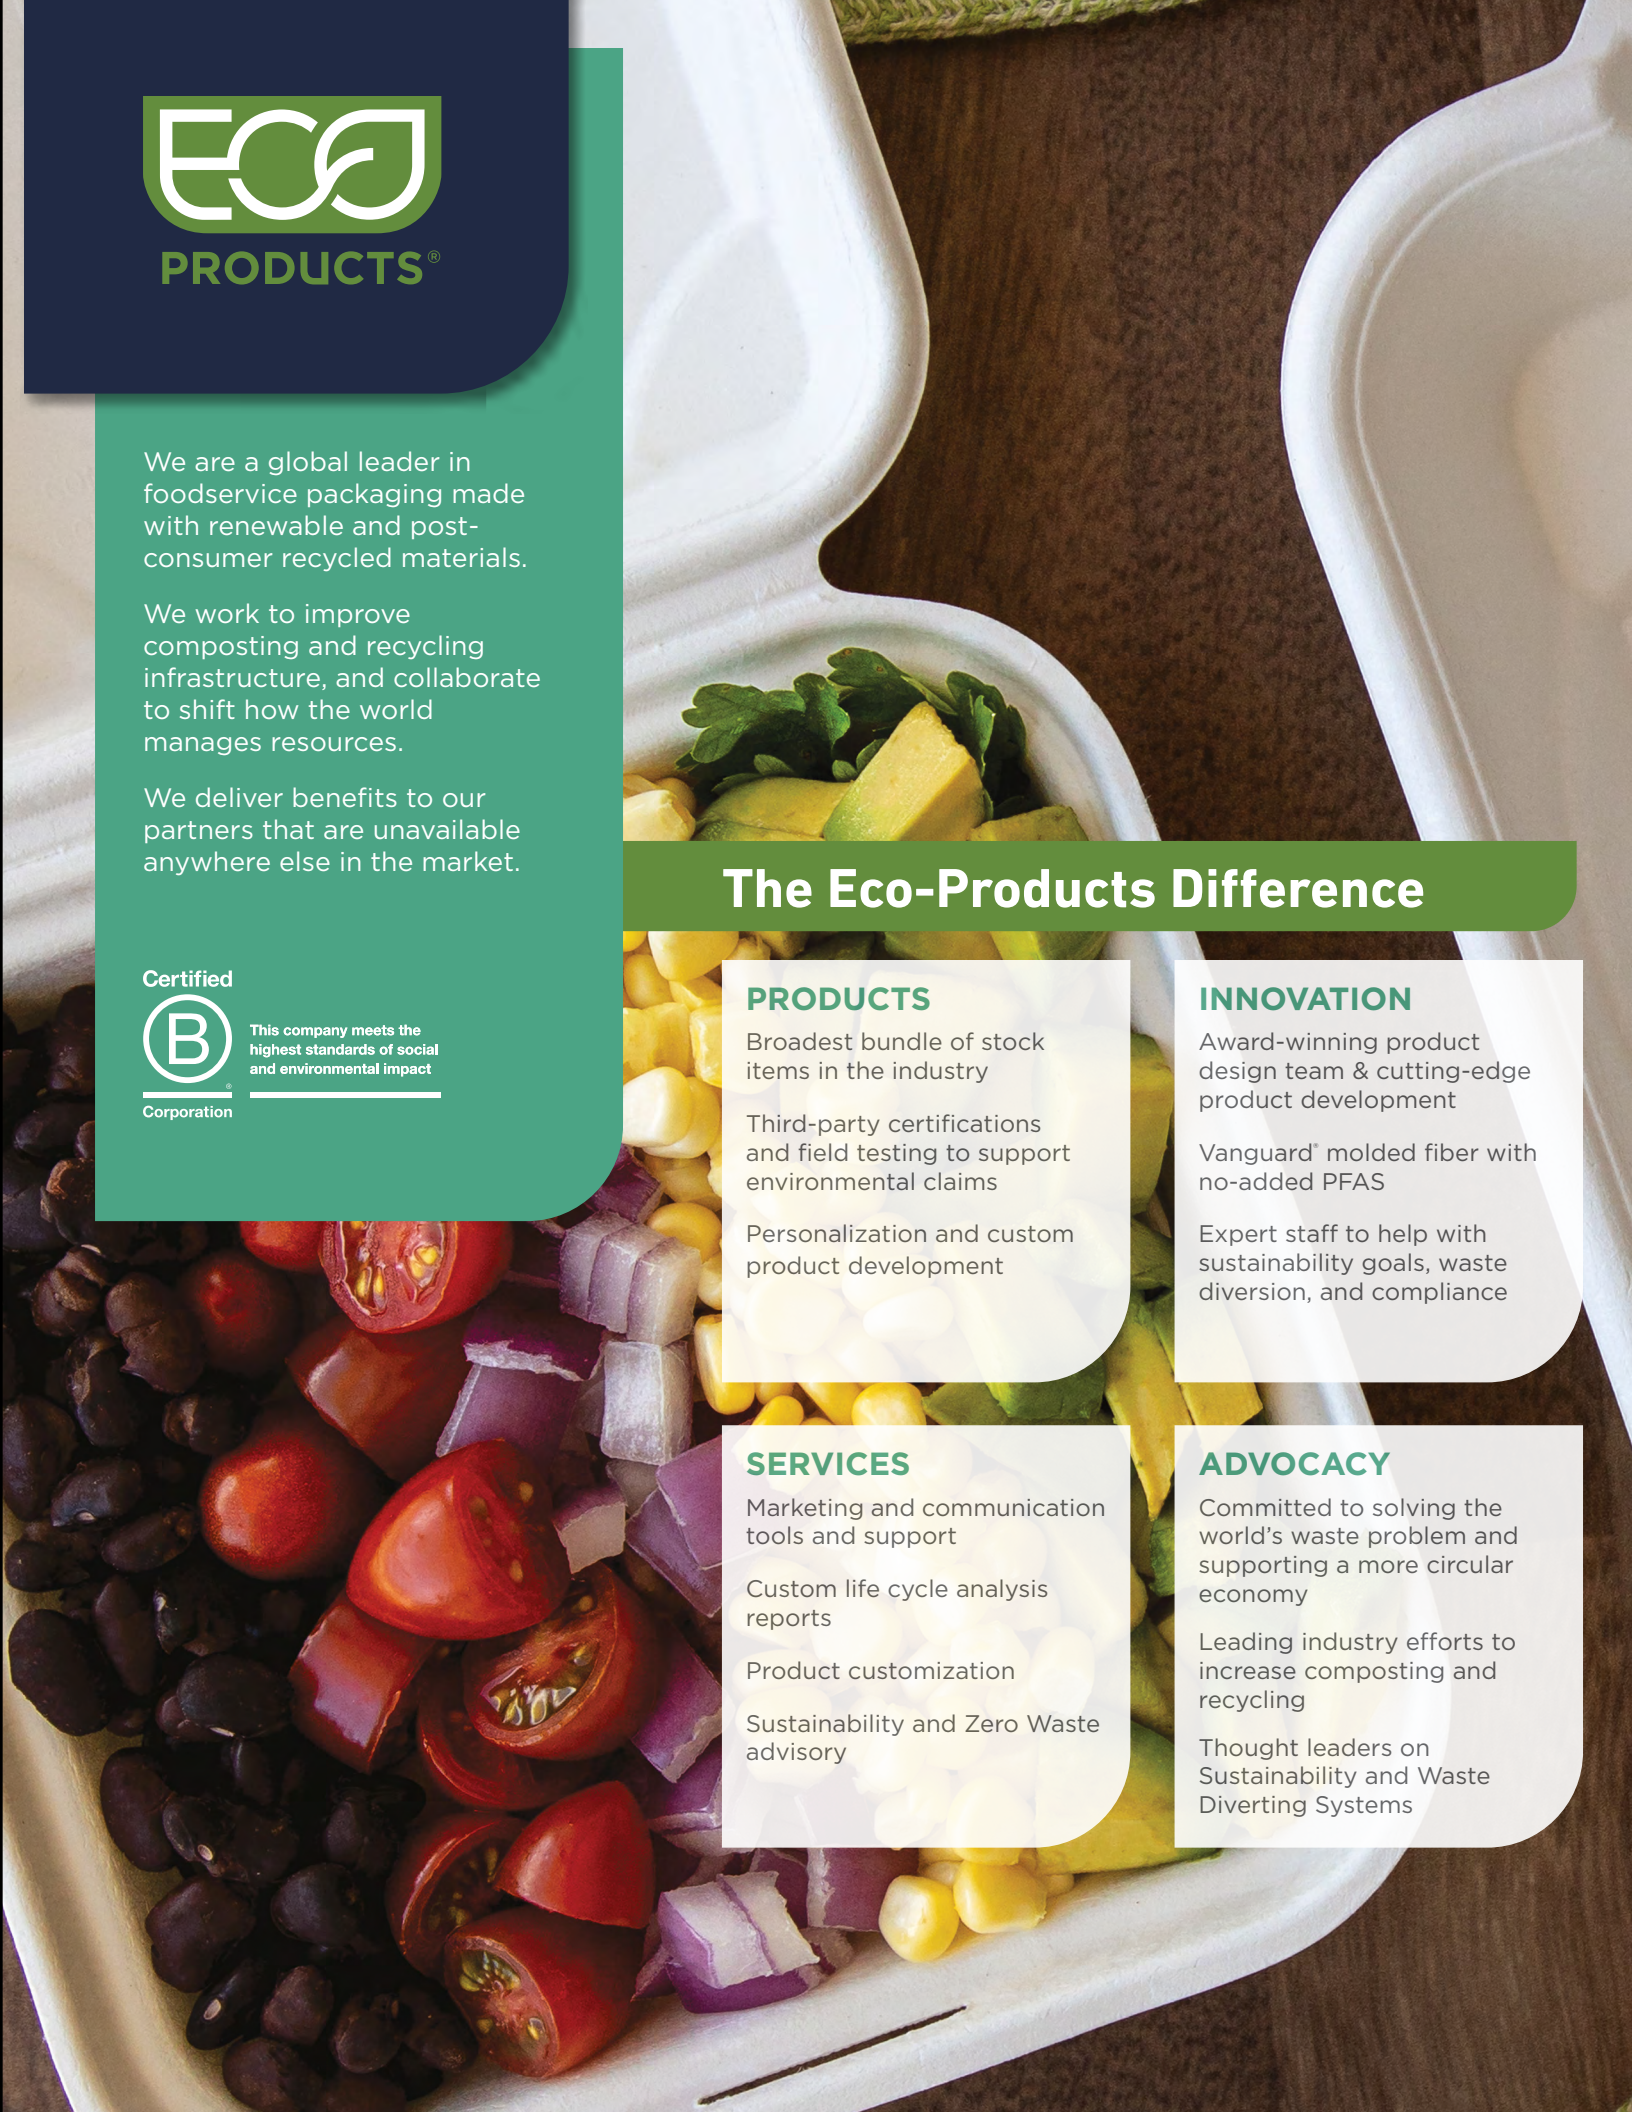
ECO PRODUCTS®

Full Line Catalog

2024



ECO PRODUCTS®

We are a global leader in foodservice packaging made with renewable and post-consumer recycled materials.

We work to improve composting and recycling infrastructure, and collaborate to shift how the world manages resources.

We deliver benefits to our partners that are unavailable anywhere else in the market.

Certified B Corporation

This company meets the highest standards of social and environmental impact

The Eco-Products Difference

PRODUCTS

Broadest bundle of stock items in the industry

Third-party certifications and field testing to support environmental claims

Personalization and custom product development

INNOVATION

Award-winning product design team & cutting-edge product development

Vanguard® molded fiber with no-added PFAS

Expert staff to help with sustainability goals, waste diversion, and compliance

SERVICES

Marketing and communication tools and support

Custom life cycle analysis reports

Product customization

Sustainability and Zero Waste advisory

ADVOCACY

Committed to solving the world's waste problem and supporting a more circular economy

Leading industry efforts to increase composting and recycling

Thought leaders on Sustainability and Waste Diverting Systems

COMPOSTAGE COMMERCIAL SEULEMENT

Product & Zero Waste Specialists

Our regional Product & Zero Waste Specialists (PZWs) work with end users, haulers, composters, and recyclers to create meaningful Zero Waste success stories. From small coffee shops, to universities, to large sports venues and multi-day festivals, our Product and Zero Waste Specialist team uses a combination of local relationships and industry expertise to assist our customers with diverting as much of their waste as possible.

Waste diversion of compostables can appear to be a complex process, but our Product and Zero Waste Specialists make it look seamless.

If you're just opening a business and looking to implement zero waste strategies from Day 1, or an NFL stadium with a history dating back to leather helmets, contact our PZW team. They will call on their passion and expertise to find a right-sized solution that works for you.

PZW Duties Include:

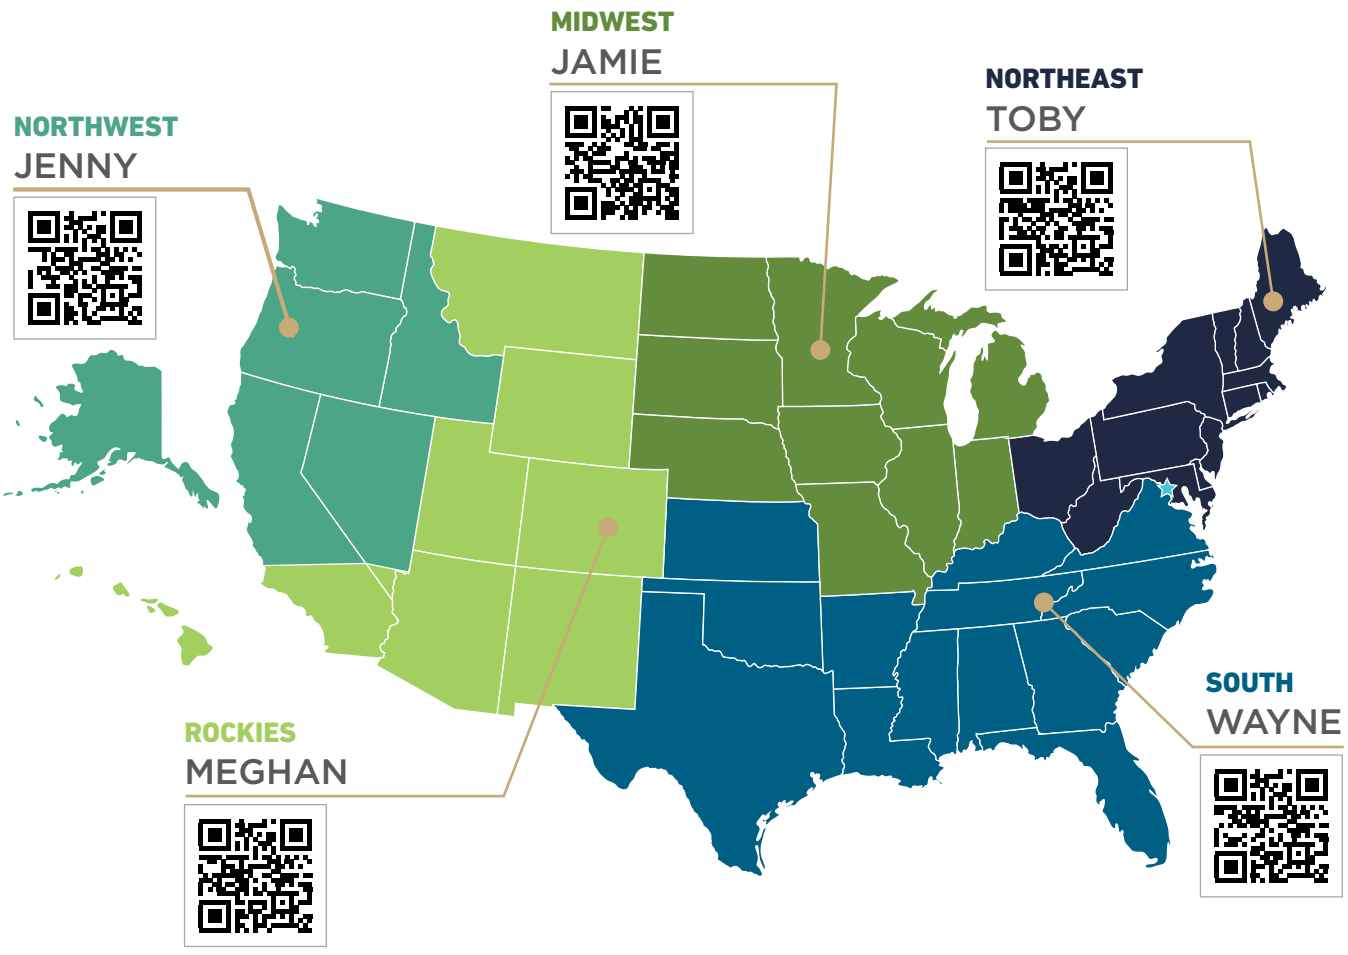
Keeping up to speed on local legislation, policy, and composting infrastructure.

Supporting broker and distributor sales reps with any key operator opportunities.

Managing database and analytics specific to our network of composters and haulers in their marketplace.

Assisting in the advancement of waste-diverting operators by offering both marketing and training support.

Contact your PZW today!



CIRC: Controls Intended to Remove Contamination

Introducing a new program developed by Eco-Products to address the challenge of contamination from non-compostable materials in compost streams through a systems approach to Procurement, Operations, Communication, and Composter & Hauler Engagement.

What is CIRC?

The "CIRC" Program (Controls Intended to Remove Contamination) is a scalable, "generator-focused" (think Restaurants, Stadiums, Venues, etc) contamination mitigation program designed to do three things:

1. Systematically control and mitigate contamination from non-compostable materials.

2. Increase composter confidence in organics streams that contain post-consumer food scraps and certified compostable packaging.

3. Demonstrate that a systems approach to contamination mitigation is possible in an array of foodservice environments.

Learn more at ecoproducts.com/CIRC

Our Two Product Lines

We offer a variety of products that balance environmental, performance, economic, and market needs. We categorize our bundle into two lines defined by their material characteristics and their end-of-life potential.

GreenStripe®

Made with Renewable Resources

Compostable*

All GreenStripe products are made with renewable resources like sugarcane, bamboo, corn, and tree fiber. Other features of individual products include:

- Meet ASTM standards for compostability
- BPI-Certified compostable
- CMA approval

BlueStripe®

Made with Post-Consumer Recycled Content

All BlueStripe products are made with post-consumer recycled materials and:

- Incorporate the highest amount of post-consumer recycled material possible without compromising performance
- Like almost all foodservice packaging, BlueStripe items are not recyclable in a majority of communities
- Not compostable

*Compostable in commercial facilities only, which may not exist in your area.

Custom Product Development

Our Product Development department is the most award-winning team in the industry with 10 QSR/FPI Foodservice Packaging Awards since 2013. Our newest award on the shelf is from the Foodservice Packaging Institute and QSR Magazine for our digital printing on molded fiber capabilities.

Custom products help operators complete a more sustainable bundle, solve unique problems, and contribute to brand cohesion and recognition **Talk to your sales rep to start a custom project.**

Custom Print & Emboss

With more than 100 customizable products, every piece of packaging can be a brand touch point contributing to your customers' overall experience. **See page 46 for details**

What is Compostable?

Compostability Standards & Certifications

ASTM INTERNATIONAL

ASTM International, formerly known as the American Society for Testing and Materials, is an international organization that develops and publishes voluntary consensus technical standards. There are currently three different ASTM standards for compostable products and materials – D6400, D6868, and D8410. These standards define the baseline requirements for compostability including time frames for disintegration and biodegradation.

BPI COMPOSTABLE

The **Biodegradable Products Institute (BPI)** is the leading authority on compostable products and packaging in North America and has been certifying materials and finished goods since 1999. All products and materials certified by BPI meet ASTM standards for compostability in addition to BPI's own requirements for eligibility, fluorinated chemicals (PFAS), and labeling.

How It Works

The baseline for all products making compostability claims in North America are the tests called for in the ASTM standards. Those tests happen in approved labs, and are repeatable indicators of how products will perform in a "real world" compost facility. BPI reviews the test results, adds in their own provisions for fluorinated chemicals (PFAS) and labeling, and grants certification to items that meet the requirements.

Despite the absence of an ASTM standard for field disintegration testing, it has become an important data point for composters, particularly as processing technologies and time-frame requirements have evolved. We work with composters to evaluate how our products are performing in different real world environments, and many have been approved by CMA for their performance in specific composting technologies.

Field testing for Compostable Products

We submit all of our BPI-Certified items to the Compost Manufacturing Alliance (CMA) for field testing.

CMA is a nationwide partnership of compost manufacturing facilities providing field disintegration testing for foodservice products. CMA's mission is to make compost manufacturing more sustainable by working proactively to field-test compostable products in real-world compost processing technologies. We were one of the first supporters of CMA as we see value in having composters test and confirm that our products break down successfully at their facilities. This is a valuable complement to the lab-based BPI certification, which we have long used as third-party validation of compostability.

Composting Technologies:

CMA-W
(Windrow Technology)

CMA-I
(Covered In-Vessel)

CMA-MSAP
(Modified Static Aerated Pile)

CMA-TA
(Tunnel)

CMA-S
(Substrate Acceptance)

VANGUARD
ECO
PRODUCTS

Vanguard®
Molded Fiber

Our Vanguard® offering is a groundbreaking and award-winning line of molded fiber plates and containers using proprietary alternative compounds to achieve grease-resistance performance without relying on added PFAS*. Vanguard® demonstrates our continued commitment to choice and innovation in foodservice packaging. We currently offer more than 80 Vanguard SKUs - look for them throughout this catalog.

- » Made with Molded Fiber
- » Microwaveable and freezable
- » Hot and cold food friendly
- » Grease- and cut-resistant
- » Proprietary alternative compounds to achieve grease-resistance performance
- » BPI-Certified compostable
- » Patented grease-resistant formula

PFAS
PERFLUOROALKYL & POLYFLUOROALKYL SUBSTANCES

No-Added PFAS

Per- and polyfluoroalkyl substances (PFAS) are a class of synthetic chemicals used in many products to impart water- and grease-resistant properties. Vanguard® uses alternative FDA-approved chemistries to achieve similar performance without the use of added PFAS. Patents pending on the new formula.

BPI® COMPOSTABLE

BPI-Certified Compostable

Biodegradable Products Institute (BPI) is a third-party organization that provides certification for materials and products that break down in a commercial composting environment. “BPI Certified” means a product has gone through a rigorous testing process for compostability.

GREENSCREEN CERTIFIED SILVER™

GreenScreen Certified™ Silver

Developed by Clean Production Action (CPA) and the Center for Environmental Health (CEH), GreenScreen Certified is an independent, non-profit certification standard that promotes the use of preferred chemicals in products and manufacturing. Silver certification prohibits the use of chemicals in the Restricted Substances List (RSL) – including PFAS - set within each product category plus thousands of chemicals listed on globally recognized chemical hazard lists. Every chemical used in the Vanguard® formulation went through evaluation. This certification attests that the product does not contain known chemicals of high concern to human health and the environment.

*Per- and polyfluoroalkyl substances

Cutlerease™ Dispensing System

Clean, Hygienic Cutlery

- The innovative Cutlery*ease* system dispenses clean cutlery one piece at a time.
- Tape tabs offer easy pick up and loading of cutlery into cartridge without having to touch any part of the cutlery.
- Handle-first delivery ensures guests touch only the handle of the cutlery they are taking.
- No trays or levers; helps prevent accumulation and transfer of germs.
- Compact footprint: <1 ft² for 3:1 space savings over the other guys.
- Customers can take only what is needed.
- Customize your cutlery options. Cutlery*ease* is so versatile, you can mix and match cutlery to meet the needs of your business. Need more spoons than forks? No problem.
- Eco-Products Cutlery*ease* cutlery is BPI-Certified compostable, so it's compatible with Zero Waste Systems.

Not Compostable Vanguard

U.S. patent no. 8,272,533; other U.S. and international patents pending

Hot Cups

Our GreenStripe® design may have morphed over the years, but what it stands for has not. When we started making foodservice products way back in 2007, our GreenStripe® hot and cold cups were a renewable and compostable alternative to conventional cup choices, and the same is true today. Trusted by composters and customers alike, you can't go wrong with GreenStripe® or any of our other hot cup prints.

- » Made with renewable resources
- » Lined with PLA, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-Certified compostable

Paper Food Containers

These may look just like your everyday paper food containers, but they are oh so much more. Made entirely from materials that can be grown again and again, these cups fit into your life easily and without excess waste. Compostable, renewable, good looking, and functional. You couldn't ask for a better fit.

- » Made with renewable resources
- » Lined with PLA bioplastic, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-Certified compostable

GreenStripe® Cold Cups

This is not your (virgin plastic, non-compostable, non-recyclable) red party cup. This is the one and only GreenStripe® renewable and compostable Cold Cup! This cup holds drinks without leaking, rocks its environmental attributes, and is always the life of the party. Best of all, when it's time to go home, this cup is 100% certified compostable and returns to the soil...until your next bash.

- » Dome, flat, and sip lids
- » Made with renewable resources
- » Made with PLA , a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI-Certified compostable

Straws

Need straws? We got 'em! We offer all kinds of options for lengths, diameters, and wrappers. Our PLA and Paper Straws are compliant with many straw bans around the U.S. Not sure what's allowed in your area? We stay on top of legislation like that, so we can help you find the info. Reach out to your Sales Rep or Operator Specialist to discuss.

- Made with PLA bioplastic, a plant-based plastic, or paper
- PLA straws meet ASTM standards for compostability and are BPI-Certified compostable

Clear Grab & Go Containers

Life is all about choices, and isn't it a wonderful feeling to stand in front of a display case of beautifully arranged food in colorful stacks to choose what to eat for lunch? Say no to the waste that comes with old-school containers and reach for something different. Fill your fridge with these attractive and environmentally preferable clear containers. Your customers will grab, go, and even better, come back again for seconds. They're clearly a better choice.

Not Compostable Vanguard

WorldView™

Our WorldView™ Containers combine Molded Fiber bases with RPET or PLA lids for maximum strength and optimum presentation. Renewable and compostable PLA lids are perfect for cold foods, while the 100% post-consumer recycled content lids work equally well for hot or cold dishes.

- » Available in a variety of shapes and sizes
- » Bases made with renewable and reclaimed molded fiber
- » Lids made with PLA bioplastic or 100% post-consumer RPET
- » Bases and PLA lids meet ASTM standards for compostability
- » Some sizes available in BPI-Certifed Vanguard® with no-added PFAS
- » Bases and RPET lids are hot-food friendly

Bowls

Just say yes to Molded Fiber! This reclaimed, renewable fiber is strong, sturdy, and compostable. A multitude of sizes and shapes make our bowls suited for the tiniest side portion to an individual serving, all the way up to a family style entrée.

- » Made with renewable molded fiber
- » Three shapes and many sizes to choose from
- » Select sizes available in white or natural color
- » Meet ASTM standards for compostability
- » Some sizes available in BPI-Certifed Vanguard® with no-added PFAS
- » For use with hot or cold foods
- » Grease- and cut-resistant
- » Microwaveable and freezable

Folia™ One-Piece Containers

We designed our patented Folia™ line to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak-resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of shapes and sizes that satisfy a broad scope of foodservice needs. It's also the recipient of the "2013 Package of the Year" award from QSR Magazine and the Foodservice Packaging Institute, as well as the "iF Packaging Design Award 2014 – Gold."

- » Made with renewable molded fiber
- » Meet ASTM standards for compostability
- » BPI-Certifed compostable
- » For use with hot or cold foods
- » Microwaveable and freezable
- » Embossed to show off handy features like pull tabs, perforated flaps, cutlery nooks, and sauce caddies
- » Molded, spill-resistant corner flaps
- » Engineered stackability

Paper Food Trays

Paper Food Trays are the ultimate workhorse of the concessions world. Whether you're tossing up some chili fries or dishing out your signature nachos, there's a size to handle it. Resilient to grease and cuts, and freezable, these trays will keep food junkies happy.

» 1, 2, 3, and 5lb sizes

» Made with renewable resources

Sandwich Wraps & Fry Cups

Printed to coordinate with our food trays, the fry cup is compostable PLA-lined paperboard just like our hot cups. Our 12x12 paper wrapper can be used as a deli sheet, basket liner, or wrapper.

- » Made with renewable resources
- » BPI-Certified compostable

Regalia™ Trays & Bowls

Cover all your catering needs with our classic trays, bowls, and serving utensils. Molded Fiber bases and clear lids provide performance, presentation, and sustainability benefits that can't be beat.

- » Made with renewable molded fiber
- » PLA lids and Vanguard items are BPI-Certified compostable
- » Non-Vanguard items meet ASTM standards for compostability

Regalia™ Half Pans

Ready to party? We are! You can't beat the convenience of drop-off catering, especially when it involves guilt-free single-use servingware. Mix and match our Half Pans with one, two, or four compartments to serve a whole smörgåsbord of hot and cold foods. Pack it up, drop it off, and then be done. Our newest PLA-lined versions even feature a locking tab closure for extra lid-fit insurance in transit.

- » Available in three compartment configurations with a common lid
- » Made with renewable molded fiber
- » BP:I-certified compostable
- » Lined Half Pans feature tab/slot locking system
